

City of Karratha - Karratha Ward - Councillor

PARSONS, Bart

I am asking for a second term on council to continue my work of ensuring future development ideas are well planned and executed, so the livability of the city improves for the people who choose to call this special place home.

While mining will always be a major part of life in Karratha, the only way to ensure stability and sustainability for the future is to develop the city in the right way that focuses on the PEOPLE rather than the needs of large corporates. This in turn will give a greater sense of community and entice more diversity, which will have a positive flow on effect for local business as well as the major mining companies. If we can prepare the city now for the next cycle we can eliminate the need to use words such as cycle and create long term prosperity and livability for this great City.

Postal Address: PO Box 1447 Karratha 6714
