Subject: Proposal for rates

How about the city tighten it's belt and trim some of the useless positions and wasted functions that they have before you just up my taxes.

What are you doing to save money and reduce cost on the rate payers. This is info you should be giving us before you explain how you are just upping the rates again when everyone other than a government employee or service provider is being forced to live on less and feel the pain of our countries decisions.

Regards Russell Francis
