# Securing Your Load

## RANGER SERVICES

## IS YOUR LOAD SECURED?

- The community is concerned about the amount of roadside litter within the City.
- A large portion of this roadside litter comes from insecure loads and materials blowing from the back of vehicles, trailers and trucks.
- The plastic wrap, work packaging, drink containers, esky lids and such like that blows from the back of a vehicle comes under this legislation.
- Not only does it make the roadsides look untidy it can be potentially dangerous to drivers who are following you.
- It is an offence to transport anything in a ute, trailer or truck that is uncovered or poorly secured in place.
- Material does not have to leave the vehicle to be considered insecure. Failing to secure, cover or contain materials can result in action taken against the driver
- If any material does leave a vehicle during transporting, this can constitute another offence and may be subject to a \$200.00 fine or court action.
- Green waste is also classed as litter
- This offence does not depend on the amount or size of the litter

## THE RIGHT WAY

- Use something like tarps or shade cloth roped down to fully enclose or other means sufficient to cover any load containing light or loose materials.
- Try netting or roping to secure larger bulky or heavier items.
- Check your load or materials in the back before you take off and periodically during your journey
- Immediately retrieve any materials that have left your load.

## THE WRONG WAY

- Wedging materials together in the hope they hold together in transport is not sufficient.
- Transporting garden waste in unenclosed or uncovered trailers
- Using open netting on loose materials will not contain the materials
- Throwing light items in the back of vehicle will be caught by the wind and dislodge
- Dust or debris from gravel or sand loads will still be classed as littering.
- Wetting down loads does not ensure they stay in place

## DO YOU...?

- Dampen soil or sand before transporting to minimise dust and cover to stop any loose materials dislodging?
- Cover your light and small material loads with a complete cover?
- Secure your bulky materials with ropes or netting?
- Secure your covered load with straps or rope tied with firm knots?
- Make sure objects do not protrude from the line of your vehicle.
- Check your load regularly?
- Pick up anything that leaves your load.
- Keep a bin or bag in your vehicle for personal rubbish disposal?
- Separate light materials from heavy bulkier materials?
- Not place lighter materials under bulky materials and hope it stays in place?
- Report littering or inadequate load coverings?
- Understand that any materials that leave your vehicle can be classed as litter?
- Want to enjoy an unlitteed Pilbara?
